

TRACK CHAIR BIOGRAPHY

Qing Wang

Professor

Director & Taishan Distinguished Professor
Institute of Advanced Engineering Materials and Structures
Taishan University, China

Prof. Qing Wang received his doctoral degree from the Tongji University for a work on interface strength of fiber reinforced composites in 1996. In 1998 he became a full Professor of Material Mechanics at the Shandong University of Technology, China. In 2000, he joined National Institute of Advanced Industrial Science and Technology (AIST), Japan. In 2014 he moved to Shandong University of Science and Technology, China, as Taishan Distinguished Professor. In 2017 he acted there as the Dean of the department of Materials Sci Eng. In 2022 he moved to Taishan University. Now he works there as a Director and Taishan Distinguished Professor of Institute of Advanced Engineering Materials and Structures.

Prof. Qing Wang' main area of research is micro- and nano-fabrication and its application in advanced functional materials used in civil engineering. This involves the development of fabrication methods for the advanced functional materials at continuum scales during the nano- and micro-fabrication process.

Scientific and Professional Societies

Editor-in- chief, International Journal of Advances in Applied Sciences

Editor, Structural Monitoring and Maintenance

Editor-in-Chief, Advanced Nanoscience and Technology
